

Web Design Planner

Thank you for downloading our Web Design Planner. Let's keep the questions short and to the point. When you've completed signing the fields, please send a copy to mail@altervisionmedia.com.

We need to know your name and contact information.

Tell us a little about your company, product or service.

Are you seeking design work for a new or existing project?

What are your goals for this web design project?

What would you like to provide us in terms of deliverables? For example, "Four intricately designed HTML pages with CSS," or "A series of templates we can use in our Content Management System," or "We need the whole enchilada—HTML, CSS, etc. This project is freaking huge."

If you are providing the backend or CMS, what will this be? If you have no idea, skip this.

Give us some words that describe the desired look and feel. Words like "sophisticated, groovy, simple, impressive, advanced, fancy, etc."
